(H1) IT ASSET RECOVERY, COMPUTER LIQUIDATION, and E-WASTE RECYCLING

A major challenge for businesses these days is managing surplus IT equipment. While technology refreshes are necessary to remain competitive, dealing with a never-ending trail of used equipment can be a major issue. Although most organizations want to handle e-Waste properly, many don't know where to begin.

- *Who can I trust to manage the process and how will I know if it's done correctly?*
- *What - if anything - is my old equipment worth?*
- *How do environmental regulations concerning e-Waste apply to me?*

These are all important questions to ask and should not be taken lightly. Working with the right e-Waste recovery partner makes the entire process easier, faster, and more affordable than you might think.

At Emergent Group, we offer comprehensive e-Waste management solutions to organizations throughout the US. We are a certified [R2 electronic waste recovery partner](#) and adhere to the highest national standards for data security and destruction.

Additionally, we offer IT liquidation services to give your old equipment new life and generate additional revenue for your organization.

(H1) RECYCLING GENERATES INCOME

Let's face it - updating technology is an inherent part of doing business these days. While IT departments need to be proactive to stay competitive, new systems become obsolete almost as quickly as they are installed. Thus organizations face dealing with a never-ending cycle of electronic waste and the headaches that go along with it.

Understandably, many businesses feel that surplus technology is a liability and must “*go away*” as soon as possible. While it's true that excess computers and electronics can negatively impact your bottom line, they can also be a potential source of income.

The old saying “*one man's trash is another man's treasure*” certainly applies to IT. For the same technology you no longer need may be exactly what others are looking for. Best of all, **liquidating IT assets increases ROI and provides more revenue for growth.**

Are you holding on to outdated servers, pcs, or mobile devices that need to be gone? Is your company looking to merge resources, streamline operations or downsize your assets?

Liquidating excess technology is a great option to accomplish your goals and make money at the same time.

(H2) TECHNOLOGY BROKERAGE EXPERTS

The Emergent Group's liquidation specialists understand the complexities of buying and selling technology assets. That's why we utilize a vast array of resources to ensure you get **top dollar for your used equipment** and make the entire experience as seamless as possible.

Partnering with Emergent Group gives you access to the best minds in the industry.

- An entire E-Commerce division dedicated to analyzing the latest sales trends and pricing your equipment accordingly
- Wholesale managers that maintain relationships with large networks of vetted buyers (who purchase quickly and with less hassle)
- Dedicated account representatives to handle your claim from start to finish

You also get peace of mind from knowing that any items that cannot be sold will be recycled appropriately. Any work performed is done in accordance with local, state and federal guidelines.

We also securely wipe all hard disk drives (to Department of Defense standards) and provide a complete list of makes, models and serial numbers for auditing and tracking purposes.

More money, less hassle, safer disposal and doing your part to help the environment – Emergent makes the process easy.

If you need assistance with your IT asset recovery, e-Waste recycling, or computer liquidation needs call **512-832-6959** or contact us online at info@emergentdeals.com.

Our trained experts will walk you through the entire process and determine what options may be available. There is no charge to speak to us and we'll be glad to provide a custom estimate for your specific needs.

“e-WASTE RECYCLING AND DISPOSAL” PAGE

(H1) E-WASTE RECYCLING - SIMPLIFIED

At Emergent, technology recycling is more than just a buzzword - it's the heart of our business. **Our mission is to help organizations of all sizes dispose of excess electronic waste in the most environmentally-friendly way possible.** We take pride in providing legal compliance for technology disposal and protecting Earth's precious natural resources at the same time.

For example, our recycling services follow stringent government standards for the proper disassembly and reuse of common electronic devices and components. We also safely manage any associated hazardous waste, toxins, or carcinogens produced as a result of the recycling process.

Furthermore, we adhere to all [EPA guidelines for e-waste disposal](#) - that means never having to worry about contamination to soil, water, air or food sources. A stark contrast to many other so called “*recycling companies*” who simply ship (and dump) their e-waste to developing countries.

Emergent Group is recognized as an **R2, ISO 14001, and OHSAS 18001 certified organization**. These designations ensure you'll receive the highest-quality recycling services while we promote and maintain the safety and well-being of our employees.

[Contact us](#) today to learn more about any of our services.

(H2) PROTECTING OUR ENVIRONMENT

Emergent Group adheres to a strict “zero landfill” policy. This means we break down every item we receive into smaller components and recycle them into raw materials for other products.

Absolutely ZERO trash is sent to landfills or incinerators.

Many organizations are unaware of how dangerous e-Waste can be. Computers, cell phones, monitors, and batteries often contain hazardous chemicals such as [lead](#), [mercury](#), cadmium, and arsenic - all of which cause serious, potentially fatal health defects.

It's not all doom and gloom, though - because recycling generates huge benefits as well.

Most electronics contain a number of renewable resources including gold, silver, aluminum, copper, glass, and plastic. Recycling these items reduces the energy required to mine and manufacture raw materials. Reuse also minimizes greenhouse gasses and toxic emissions produced as byproducts of the manufacturing process.

In fact, [according to recent EPA statistics](#), recycling one million laptops saves enough energy to power 3,500 US homes for an entire year. **And for every million cell phones recycled, we recover 35,000 pounds of copper, 772 pounds of silver, 75 pounds of gold, and 33 pounds of palladium.**

When you recycle with Emergent Group, you're not just doing the right thing, you're also helping to make the world a safer place.

(H2) ELECTRONIC RECYCLING RULES AND REGULATIONS

While recycling is one of the best methods to protect our environment, it's also becoming the law in many areas. Although federal recycling guidelines are still being developed, several states have taken the problem into their own hands - often levying hefty fines against violators. Not to mention the **enormous PR damage environmental incidents can produce.**

That's why it's critical to partner with a company that understands the complexities of recycling laws in your area. Emergent is fluent in e-Waste protocol for all major metropolitan areas we serve. Not only can we quickly liquidate surplus IT equipment and securely erase any remaining data, but also ensure all hazardous materials are disposed of correctly.

Corporate IT departments have enough problems to worry about - penalties for recycling violations shouldn't be one of them.

Call Emergent Group today at **512-832-6959** and let us manage your next e-Waste recycling project. We can assist with equipment liquidation, technology recycling and disposal, and secure data destruction.

“IT ASSET RECOVERY” PAGE

(H1) IT UPGRADE AND REFRESH SERVICES

Is your company looking to upgrade or replace existing IT assets? Do you have obsolete equipment wasting floor space or bloating your records? Are you wanting to recycle your old electronics but are unsure of where to begin?

Emergent Group has the solutions you need.

From pickup and processing - to sanitizing and recycling - our team can handle everything. We come to you and **collect, load, and transfer any IT equipment you need to have liquidated.**

You'll never have to worry about compliance or auditing as we scan and document every item for your convenience. We inventory each asset and provide a comprehensive report that includes models, serial numbers, and asset tags.

(H2) SMARTER E-WASTE RECYCLING

No more surplus equipment taking up room or adding storage expense. Forget about outdated technology inflating your inventory or hampering progress. Say goodbye to wasted labor hours and lost productivity managing negative assets.

Emergent comes to you and makes the recovery process as simple as possible. We package and transport your items, log and inventory each asset, and then recycle or destroy them in the safest, most environmentally-friendly way possible.

If you're ready to get started, or have additional questions about our services, **call us today at 512-832-6959** and speak to one of our account specialists. We offer free consultations and can provide a customized solution based on your specific needs.

[Contact us](#) today and let us assist with your next refresh or recovery project.

“DATA DESTRUCTION” PAGE

(H1) SECURE ELECTRONICS RECYCLING AND DISPOSAL

Many IT departments worry about how e-Waste companies manage their recovery processes - and for good reason. Data breaches can lead to serious consequences such as large fines, restitution and losing major clients. With so much at stake, you have to be sure your data and devices are being handled with care.

Rest easy. For Emergent Group offers some of the safest, most secure data destruction technologies in the world today. Our cutting edge processes and equipment mean never having to worry about sensitive data falling into the wrong hands.

From the moment our teams arrive at your location, security is always top-of-mind. We transfer all assets to Emergent headquarters in fully enclosed, locked container trucks. Upon arrival at our secure facility, items are immediately inventoried and tagged to maintain integrity.

We sanitize and destroy all hard disks, magnetic tapes and other storage mediums in compliance with DOD (Department of Defense), NSA (National Security Agency) and other US and European IT standards.

Afterward, we provide detailed reports that include model and serial numbers, date and time of disposal, and the operators and methods involved in the process. We leave nothing to chance.

Our services are also HIPAA and FERPA compliant and adhere to all major federal and state regulations. You can trust Emergent to make the e-Waste disposal process as safe and secure as possible.

Looking for someone that cares about your safeguarding data as much as you do? Then call Emergent Group at **512-832-6959** or [contact us](#) online today.

“ABOUT US” PAGE

(H1) “GREEN” FROM THE GROUND UP – THE LEADER IN E-WASTE SOLUTIONS

Emergent Group is proud to meet the growing demand for technology recovery solutions while maintaining the highest standards of environmental stewardship. Founded by three partners with extensive backgrounds in e-Waste management, Emergent Group has grown to be one of the premier women-owned small businesses in the state of Texas.

Prior to forming Emergent, our leadership team helped grow another e-Waste business to #28 on the Inc. 500’s fastest growing company list. Their work also propelled that same organization to #1 in their respective business category.

(H2) RECYCLING WITH INTEGRITY

Emergent Group has experienced tremendous growth every year since inception. We **process hundreds of thousands of components annually** with a focus on sustainability and client satisfaction. This has allowed us to build strong industry partnerships while maintaining a proven track record of success.

We strive to **maximize the use of technology assets by liquidating, repairing, or recycling as many elements as possible**. This yields the highest ROI for our customers and ensures competitive pricing for our products and services.

To improve security and provide better results, we perform our work in-house under the supervision of industry experts. After separating items into “*functional*” and “*non-functional*” categories, reusable technology is tested, repaired, and sold at market value. While non-functional assets are disassembled into their smallest components and shipped to certified recycling facilities for further processing.

(H2) MINIMIZING ENVIRONMENTAL IMPACT

Emergent maintains a strict “No Landfill” policy meaning **we send absolutely ZERO trash to landfills or incinerators**. You never have to worry about where your e-Waste is going or what it will do. We perform all work under strict federal, state, and local guidelines using trained professionals.

Additionally, we are an R2 (ISO 9001/14001 and OHSAS 18001) certified operation. This means auditing and compliance for e-Waste processing as well as the safety and well-being of our employees.

We invite you to experience our world-class service for yourself. Call us today at **512-832-6959** or fill out our online [contact form](#) to get started.

“THE PROCESS” PAGE

(H1) SAFEGUARDING YOUR ELECTRONIC DATA

Emergent Group continually audits our processes and procedures to ensure the highest levels of service, quality, and compliance for our clients. Our services include sterilization and/or destruction of all recovered data storage devices including hard drives, magnetic tapes, CDs and other mediums. We are **NIST 800-8812 and DOD 5220.22M compliant** (unless otherwise requested in writing by the customer).

Our practices include multi-pass hard drive erasure and shredding/punching of any wiped disks. We also provide **certificates of destruction and a full activity report for auditing compliance**. These detailed reports contain:

- **Version numbers**
- **Drive model information**
- **Serial numbers of physical disks**
- **Service technician names**
- **Operation types performed**
- **Number of overwrites**
- **Date & time of operation**
- **Final results (pass or fail)**

** Our processes maintain compliance with HIPPA, Department of Defense 5220.22-M, Sarbanes-Oxley, FACTA, and many other US and European IT standards.*

(H2) THE E-WASTE RECYCLING AND DISPOSAL PROCESS

Our goal is making your organization’s electronic waste management project as seamless as possible. We accomplish this task by utilizing our proven recovery methods and keeping you

informed throughout each stage of the process. In most cases, we complete projects within 30 days of submission.

(H3) TRANSPORTATION (Days 1-3)

After receiving your request, our logistics team goes to work arranging for pickup within 3 business days. Emergent handles the entire transaction from packing and loading to transportation inside of our fully enclosed, locked container trucks. Equipment is continuously secured from your departing location through arrival at our Austin, TX processing facility.

(H3) EVALUATION (Days 4-28)

Upon arriving at our facility, we assign each shipment a Lot ID that corresponds to the purchase order. We barcode all equipment pallets under the master Lot ID linking each component to the master record. Every asset is then tested for functionality and usability. Repairs are made to serviceable equipment while others are evaluated for resale or other applications.

(H3) DISPOSAL (Days 29-36)

Any items determined to have value are offered for wholesale or through select e-commerce partners – whichever produces the highest return. Elements determined to be obsolete or unserviceable are then sorted and sold to a downstream R2 certified recycling partner.

Emergent maintains copies of all certification documents for downstream vendors per SERI R2 requirements.

(H3) REPORTING (Day 30)

Emergent sends all asset tags and supporting documentation to the customer for auditing and logging purposes. Furthermore, since all items are immediately tagged and assigned a Lot ID number upon arrival, assets can be quickly located at any time during the recovery process. These tools provide up-to-date reporting and historical analysis of both past and current projects.

(H2) SAFETY AND ENVIRONMENTAL PROTECTION

For added peace of mind, Emergent Group is an **ISO 14001 and OHSAS 18001 certified** company. These designations ensure all workflows are safe and comply with OSHA guidelines. All employees undergo annual safety training and are mentored and evaluated to further develop a safe working environment.

Emergent also maintains an Environmental Health and Safety Management System which details all aspects of operational guidelines. These policies have passed audits for environmental compliance and Emergent has **never been cited for a single violation.**

Emergent Group commits to safeguarding the environment and protecting our employees. In doing so, we strive to achieve the highest levels of customer satisfaction while continually improving our operational procedures.

When you're ready to partner with a company that believes in service and stewardship, then give Emergent Group a call at **512-832-6959**. We'll gladly answer any questions you may have and help you get started on your next e-Waste recovery project.
